***Status of the Claims***

Currently claims 2-5,7,11,12,14 are pending. Claims 1, 6,8-10 and 13 have been cancelled. Claim 12 was indicated to be allowable and claims 2-5,7,11 have been amended to depend from therefrom. Claim 14 was amended and remains broader in scope than claim 12.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 14 is rejected under 35 U.S.C. 102(b) as being anticipated by Brogan (GB 2270628).

Brogan discloses a breast prosthesis comprising: a back section adapted for facing a user; and an adhesive element forming a continuous surface substantially conforming to said back section of said breast prosthesis; said adhesive element extending over a majority portion of said back section and comprising an inner body comprising a semirigid material; wherein a side of said adhesive element facing said breast prosthesis is detachably secured to said back section of said breast prosthesis and a side of said adhesive element adapted for facing a user is detachably adherable to the user.

Contrary to applicant's arguments, the adhesive element (5) when applied to the supporting substrate (3) of Brogan does produce a continuous adhesive surface over substantially the entire surface of the supporting substrate (3). According to Brogan, the grid pattern is formed with continuous lines across the entire surface of the supporting substrate. As broadly interpreted, claim 14 fails to distinguish over the adhesive pattern of Brogan. The interpretation of continuous would not apply to the embodiment shown in figure 1 of Brogan

*Fig. 2*

Applicant argues that Brogan's device is "selectively incomplete" adhesive coverages differs considerably in structure and function from the adhesive element as recited in claim 14. Examiner disagrees with applicant's interpretation of the language of Claim 14. While the claim contains the recitation of "adhesive covering substantially an entire surface", this language does not preclude a grid pattern of lines that cover "substantially the entire surface" of the supporting substrate of Brogan.

***Response to Arguments***

Applicant's arguments filed 12/13/2005 have been fully considered but they are not persuasive. See examiner's arguments in the body of the rejection supra.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
